

Cost-down: in-sourcing captures the value

Direct cost per bed fills at each in-sourcing step against the held AU\$750 price; at community scale the margin stays community-owned.

Each step is gated by committed volume and a make-vs-buy decision. Margin = AU\$750 minus direct cost. Community lands at ~parity with the factory — but the fair wage and the margin both stay in community.

Source: Goods cost model (2026-05). Direct-cost figures are modelled on verified BOM inputs; AU\$750 price verified. Capex and community-labour inputs are forward estimates.
