Revenue
500 beds x \$750
\$375,000

Read left to right: every dollar of revenue is either a cost (cost of goods + freight) or contribution. Contribution first pays the \$109,500/yr fixed block; what is left is operating surplus.

Source: Goods cost model v6 (2026-06), in-house (fictory) path at 500 beds/yr. BOM + \$750 price verified; in-house plastic, labour, feight and volume modelled. Band thickness is proportional to dollars.
