

Where each AU\$750 goes

The same bed, two ways to make it. Owning the plastic processing turns a \$65 sliver into a \$324 contribution.

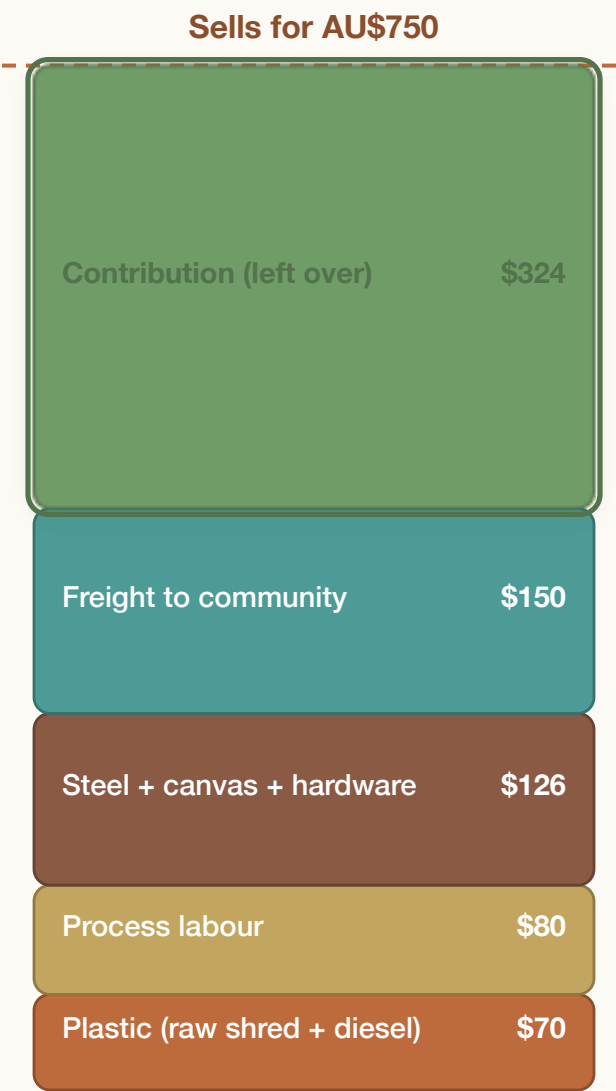

WHERE EACH \$750 GOES

Buy-Kit (today)

buy finished plastic legs from Defy

marginal cost \$685 · keeps \$65

Factory (in-house)

press our own plastic legs

marginal cost \$426 · keeps \$324

Contribution is what each bed leaves toward the ~\$109,500/yr of fixed running costs. Buy-Kit leaves almost nothing; in-house production leaves five times more.

Source: Goods cost model v6 (2026-06). BOM + \$750 price verified; in-house legs, labour and freight modelled. Freight shown at the ~100/yr rate (\$150/bed).
