

Goods on Country: theory of change

From community-led design to community-owned production: how our activities create measured outcomes on Country.

PRIORITY METRICS

Status: ● tracked (live) ◐ partial / data thin ○ modelled (proxy, not measured) □ design target

The model: community leads the design. Goods supports the building. Production transfers to community ownership.

Sources: SIH Diagnostic V4 · QBE Catalysing Impact · impact-model.ts · asset register (2026-05-26). Outcomes shown are intended; see the MEL doc for what is tracked vs modelled.
