

The goal was never a bigger Goods. It is a plant that belongs to the people sleeping on the beds.

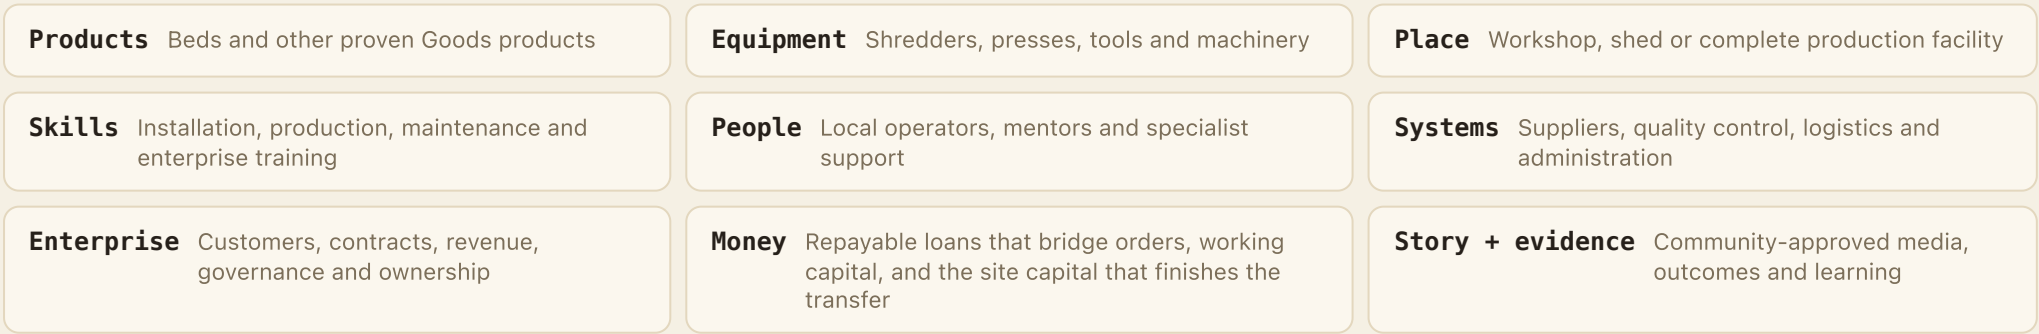

Not a product company with a distribution problem. A menu a community picks from, and a route by which the making moves into their hands.

SIX STAGES · AND WHAT THE COMMUNITY HOLDS AT THE END OF EACH

Communities can begin anywhere, move at their own pace, and choose how much support they want.

NINE MODULES · TAKE ONLY WHAT YOU WANT

Every pathway begins with what is already strong. The modules, pace, partners and ownership destination are decided with each community.

540beds deployed ● V
177 Stretch + 363 Basket**22**washing machines ● V
Pakkimjalki Kari**11**communities served ● V
12 distinct communities touched**3,540**kg recycled HDPE diverted
● V
177 Stretch × 20kg. Basket counts zero.**\$713,827**Goods revenue, FY26 YTD
● V
accountant-signed carve-out

Every bed carries a QR digital twin: GPS, recipient, delivery date. Standing behind these figures are **200 to 350 bed requests we have not filled**. These are interest and requests, never signed agreements.

THE HINGE

Pressing on Country is the whole argument.

~\$65

stays in community today, legs bought finished

**~\$324**

when pressing happens on Country, of the same \$750 bed ● M

~\$109,500 / yr

what it costs to run Goods before a single bed is made

~338 beds/yr

break-even once the pressing is ours ● M

The honest thing: the ~\$324 is modelled from verified part prices, not yet measured at production rate. The first thing your money buys is the measured run that proves it.

THREE DOORS · ALL THREE END IN THE SAME PLACE**GIVE****Goods on Country**

The Butterfly Movement Ltd. Subsidised goods where procurement cannot reach, plus training and evidence. Gifts buy time.

BUY**Goods.**

A Curious Tractor Pty Ltd. Health services, schools, councils and housing programs. Sales carry the middle.

LEND**A Curious Tractor**

Repayable loans that bridge large orders, equipment and working capital. Loans bridge orders.

OWN**Community entities**

Where all three doors end. Production, repair, local contracts and ownership rights. Site capital finishes the transfer.

THE ASK

AU\$400,000 in signed commitments by 31 August. QBE matches it dollar for dollar.

An **\$800,000** program that takes Goods to the point it funds itself and stands up the first on-Country production sites: the measured run, plant capital of roughly \$100K to \$150K per site, the first on-Country operator roles, and working capital. QBE Catalysing Impact submission 14 September 2026, outcomes November.

THE STACK WE ARE ASKING TO SIGN

SEFA **\$300K** repayable · Snow Foundation **\$100K** grant · Centrecorp **\$75K** grant

Target stack **\$475K** · signed to date **\$0** ● T as at 25 July 2026, and we say so

Floor is \$150K matched. Above \$400K the match stops and extra brings the first site forward. REAL sits outside this match as a separate vehicle, applied and not secured, at about \$2M over 3 years.

The design principle: nobody funds Goods forever. Equity is not sold. Gifts never fund the company. Sit down and ask us, make it with us, and leave the making with us.
