

Cost-down: in-sourcing captures the value

Direct cost per bed falls at each in-sourcing step, against the held AU\$750 price. The widening band is captured margin.

Each step is gated by committed volume and a make-vs-buy decision. Margin = AU\$750 price minus direct cost per bed.

Source: Goods cost model (2026-05). Direct-cost figures are modelled on verified BOM inputs; AU\$750 price verified. Capex and community-labour inputs are forward estimates.
