

GOODS ON COUNTRY

From waste to ownership.

Durable beds and washing machines, made from local plastic, designed and built with remote communities, and moving into their hands.

WASTE → PRODUCT → SKILL → WORK → **OWNERSHIP**

Goods on Country

NINGA MIA, KALGOORLIE • WHERE IT STARTED

The first bed disappeared overnight.

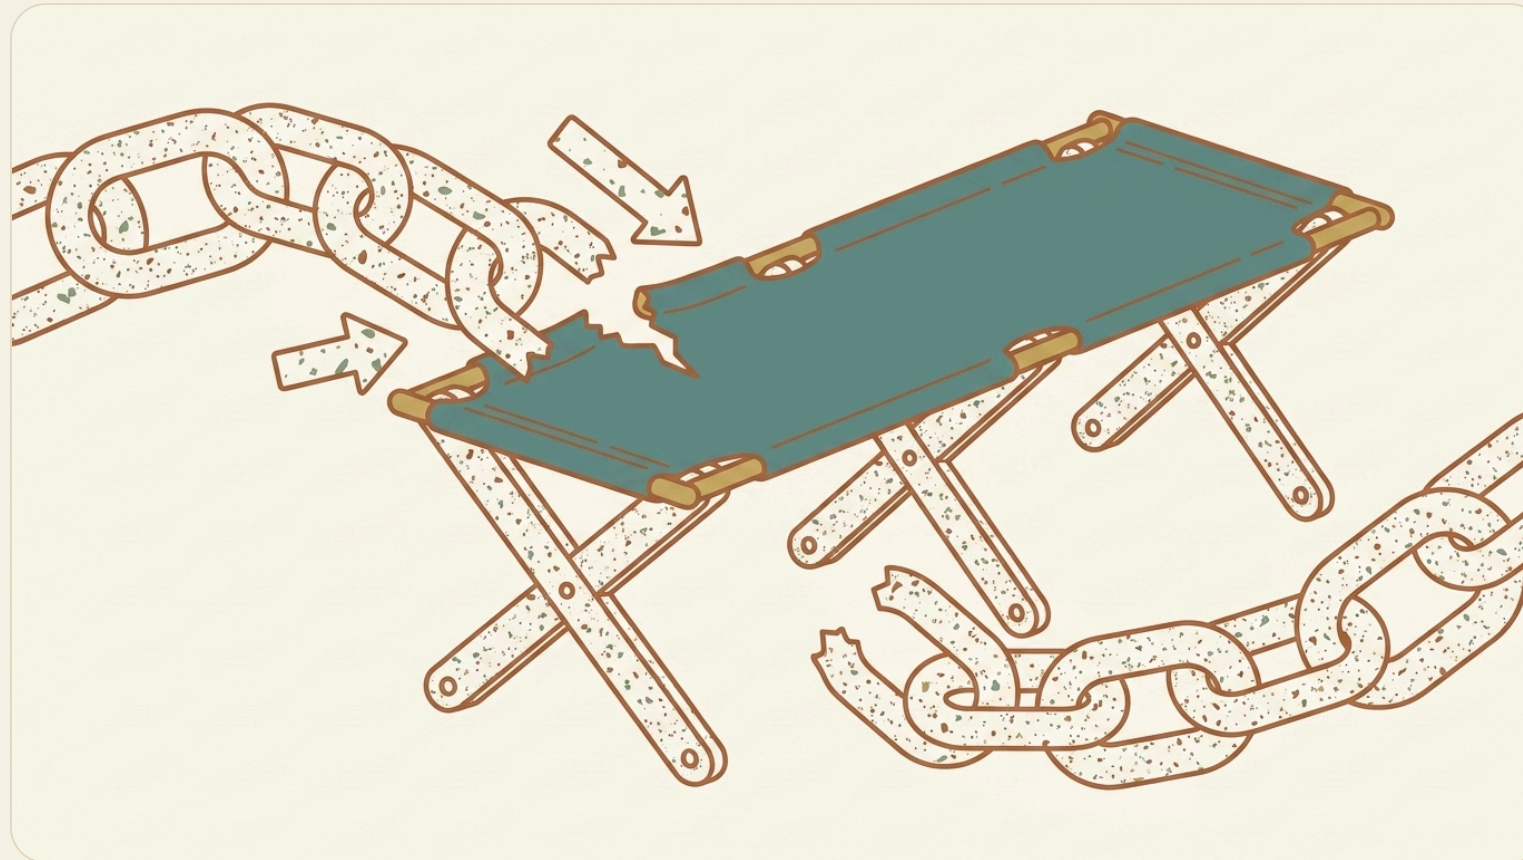

We built the first Basket Bed with Gloria and her relatives at Ninga Mia, then left it outside the tent on a windy, rainy night. We were nervous. When we came back the bed was gone.

The family had carried it inside. Our field record shows three people on the mattress; the ladies remember all six sharing it. They asked straight away for another double and a single. Later the bed failed, was repaired with rope, and the feedback changed the design.

The first Basket Bed entered the tent as a prototype. It came out as an obligation.

THE WHY

A bed is health hardware, not furniture.

CROWDING & DIRTY BEDDING → SKIN INFECTIONS & SCABIES → RHEUMATIC FEVER → RHEUMATIC HEART DISEASE

“Sleep on a good mattress. For the back, the legs, the muscles.” · Gloria Turner, Kalgoorlie

Aboriginal people carry among the highest rates of rheumatic heart disease in the world. We build the conditions that sit **upstream** of it. We never claim to cure it.

THE PROBLEM

Remote homes pay more for products that die in months.

59% of surveyed remote homes have no working washing machine at all.

Freight, repair callouts and suburb-designed appliances stack the cost against the bush. One Alice Springs provider's estimate: about **\$3M** of washing machines sold into nearby communities each year, most dumped within months.

THE PRODUCT

The Stretch Bed

26 kg

one person carries it

200 kg

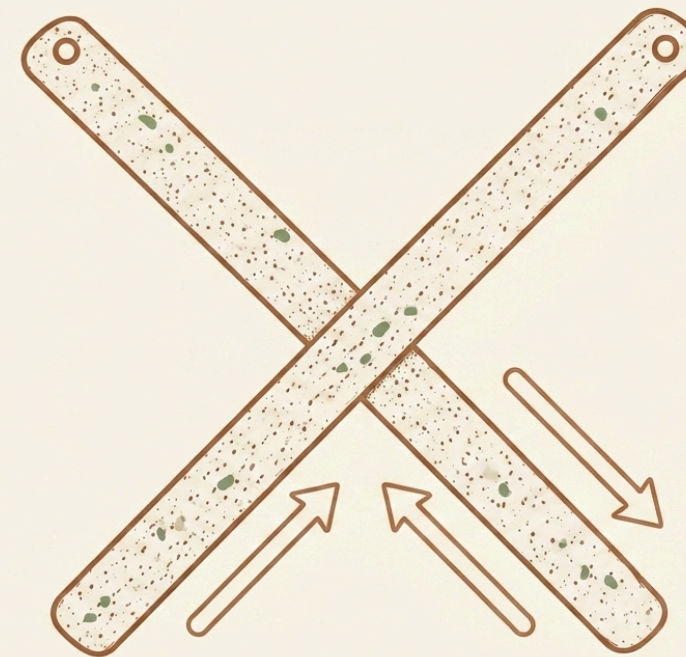

load it holds

~5 min

to build, no tools

10 yr

design life

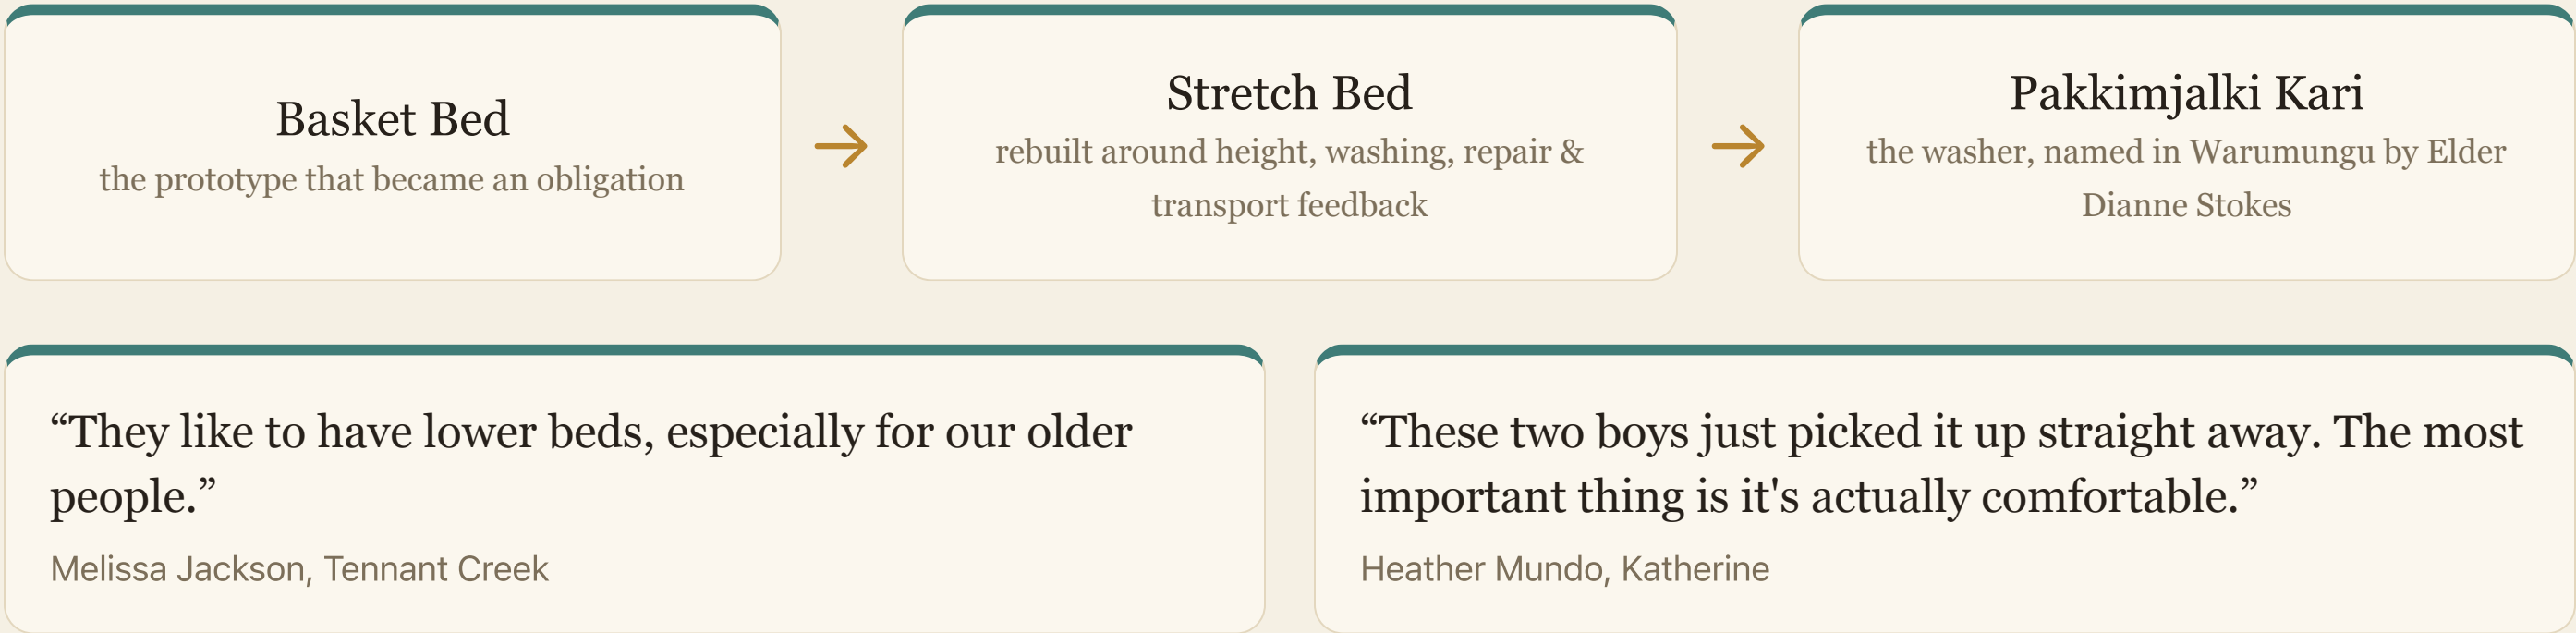

Recycled-plastic legs, steel poles, washable canvas. Designed in community. Washable, repairable, and made on Country.

“Good for me and comfy, easy to put together.” · Dorrie Jones, Arlparra
Goods on Country

DESIGNED IN COMMUNITY

Communities did not validate the design. They changed it.

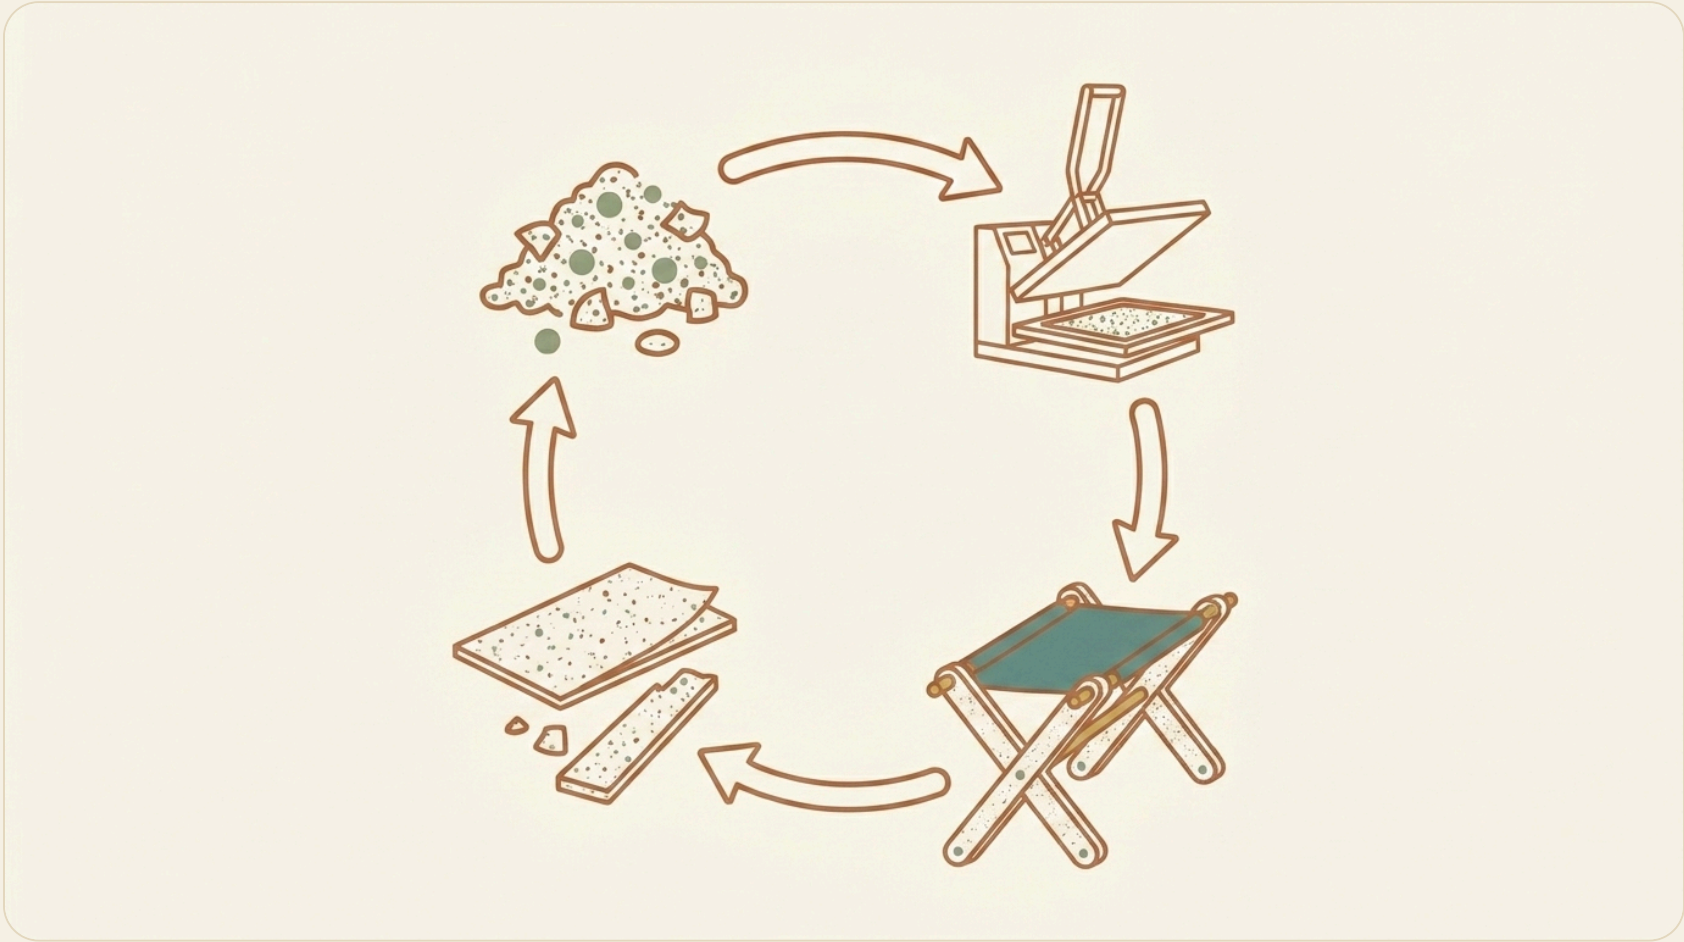

Every product change traces to a person and a place. That feedback loop is the asset the capital builds on.

Goods on Country

HOW IT'S MADE

Local waste becomes a bed.

COLLECT PLASTIC

SHRED

PRESS SHEETS

CUT & ASSEMBLE

A BED

20 kg of plastic diverted per bed ● M modelled

Goods on Country

THE MODEL

The making moves on Country.

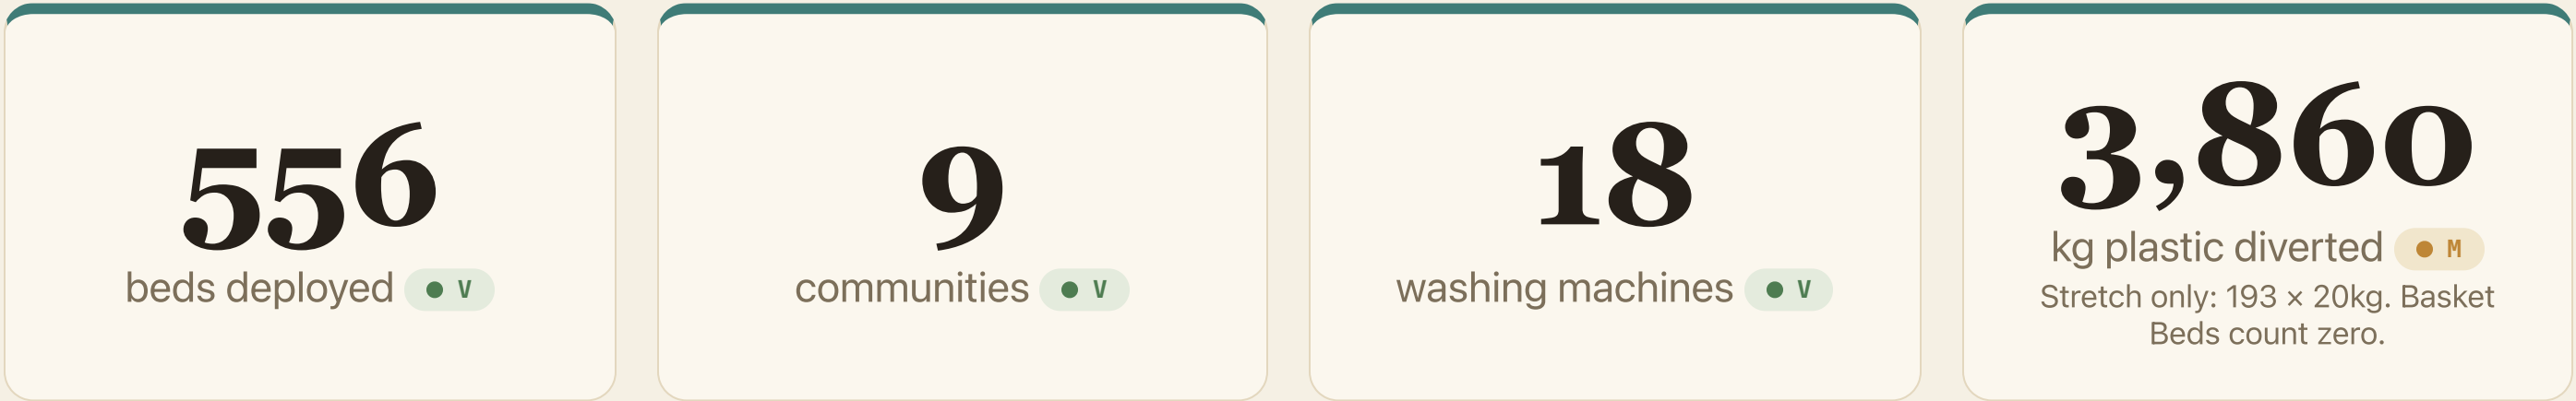

Community designs it, builds it, and over time owns the making. **Our goal is to become unnecessary.**

Goods on Country

PROOF

Already shipped, and every one is trackable.

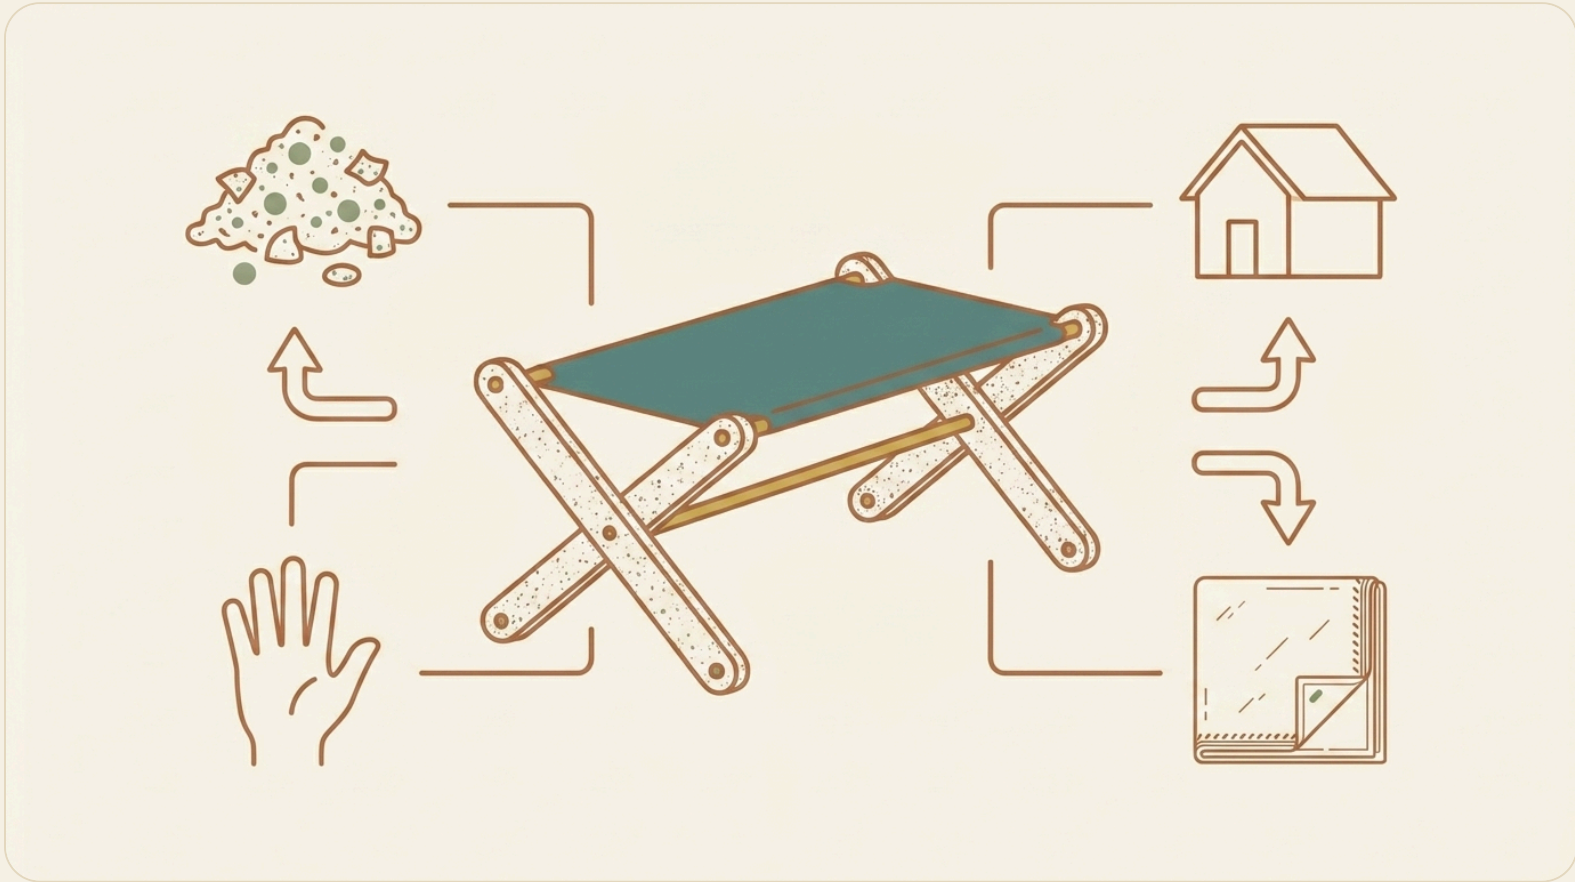

Newest: 60 Stretch Beds and 2 washing machines to Maningrida Homelands with Homeland School Company, made at our own farm production plant.

193 Stretch flagship + 363 Basket legacy. Every bed carries a QR digital twin: GPS, recipient, delivery date. "I was trying to ask them if they can make one for me." · Annie Morrison, Tennant Creek

THE IMPACT

Every bed carries a fixed impact payload.

- 20 kg plastic kept off Country ● M
- 1 family off the floor ● V
- \$130 fair wage per bed, on Country ● M
- A consented story, community-owned ● V

We label every number **verified**, **modelled**, or **target**. We never overclaim. That honesty is the impact.

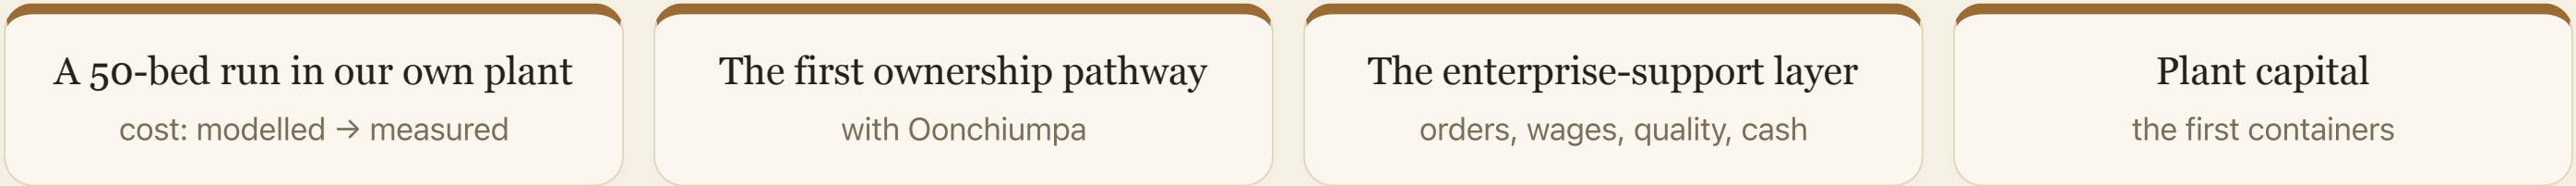

Goods on Country

THE ASK

AU\$400,000, matched one to one.

Through QBE Catalysing Impact, matched by signed commitments. Signed letters by **31 August 2026**. About \$800,000 working once matched.

WHAT IT BUYS: THE BRIDGE

Ordinary capital will not fund this stage. The return we are building is the transfer itself: the asset, the jobs and the decisions moving to community.

Goods on Country

Fair wages cost the model nothing.

Community production paying a fair wage lands about **\$5 a bed below** a factory.
There is no trade-off between viable economics and paying people properly.

\$420.74 community path **\$425.74** factory path ● M modelled

“Yeah, I’ll be rocking up every day to make them.” · Mykel, Alice Springs (Oonchiumpa)
Goods on Country

THE BEST CASE · MODELLED

One signed round seeds a fleet that funds itself.

Then each container transfers to a community corporation with its self-feeding loop. What compounds is not Goods revenue. It is **community-owned productive capacity**.

Goods on Country

the constraint is signed demand, not cost

THE CLOSE

We know what we need. Sit down and ask us, make it with us, and leave the making with us.

A Goods synthesis of community direction across nine communities. Not an individual's quote.

The return we are building is the transfer itself.
