Brand Toolkit

Brand Toolkit

This document outlines the basic elements of our identity system. As a toolkit, the foundational principles covered within act as a practical and valuable resource to ensure the management of a cohesive identity across all communications and expressions.

Logo

Black on SF Light Grey

White on SF Navy Blue

Our logo is our unique mark which identifies our brand, and is the most fundamental component of our visual identity. Our logo is to always sit next to our wordmark which is not simply a typeface—each letterform glyph has been considered to achieve a legible, visually pleasing composition known as kerning.

Logo

Clear Space and Minimum Size

Clear Space

There's nothing like a bit of clear space to help our logo stand out. Clear space guidelines act as a recommended space between the logo and other conflicting elements. This space should remain clear of any other visual elements, an edge, or text.

To protect legibility, clear space surrounding the logo should be no less than the height 'X' defined beside. There are exceptions to this rule, but as a guide, try stick to this to ensure our logo is presented clearly and visibly, and doesn't feel cramped or compromised by other elements.

Minimum Size

Establishing a minimum size ensures that the impact and legibility of our logo isn't compromised in application. The minimum size will generally vary as per the application, but keep it (well) above these figures where possible.

Logo

Incorrect Use

Our logo should never be modified, or added to. No attempt should be made to alter our logo in any way. Its orientation, color and composition should remain as indicated in these guidelines—there are no exceptions.

Here are some simple examples to help maintain the integrity and presence of our logo. These examples are meant for illustrative purposes, and should not be considered an exhaustive list of mistakes.
